

# Rose Watch Daily Report

Francis Roses · IP monitoring & evidence-management system

**As of: 2026-09-22 11:32 MST (America/Phoenix) — evidence and findings below reflect the state of each site at the time it was checked.**

Report generated: 2026-09-22 11:27 MST

## Monitoring Run Summary

All 17 known reseller companies (18 URLs) on the closed crawl roster were attempted, of which 12 served a catalog. Product catalogs were pulled directly from each accessible site's own product data feed (Shopify's product API or the WordPress REST API) and checked against the Master Trademark Filing Chart. 39 matches were carried through into full, evidence-complete case records this run. 246 previously existing cases were re-verified still present in their site's current catalog. Product titles are matched against **every** name in the Master Trademark Filing Chart, not only the Registered and Pending ones, and findings are listed below grouped by status with the most enforceable first. A match against a To Be Filed, Abandoned, Not Applicable, Do Not File or unstatused entry is recorded so it is tracked, and carries no enforceable right.

## New Findings

Every row below is a potential lead for Francis Roses or legal counsel to review — a matching product or trademark name, not a legal determination of infringement. Grouped by the trademark's status in the chart, most enforceable first: **Registered** and **Pending** marks carry weight that **To Be Filed**, **Abandoned**, **Not Applicable**, **Do Not File** and unstatused entries do not. Click “View listing” to open the seller's product page.

321 cases on record to date: **39** against Registered trademarks and **138** against Pending. The dashboard carries the complete history, including Pending cases, with evidence and review status.

## All Cases on Record

Every case on record to date, not just today's, in the same order: Registered and Pending first, then the statuses that carry no enforceable right. The dashboard holds the full evidence for each.

| Your Roses                       | <a href="https://your-roses.com/">https://your-roses.com/</a>                                                               | STILL BLOCKED, now five days old (first seen 2026-09-18). Unchanged from Friday's 2026-09-21 check: the site root answers HTTP 200 while every catalog path is refused -- /wp-json/wp/v2/product returns 403 and the Shopify feed path returns 404 (a bare /products.json returns 403). The 403 is the seller's own LiteSpeed/Hostinger firewall, not this environment's egress proxy; the CONNECT succeeds. No attempt was made to work around it. The site's 33 cases (YOURROSES-001..033) still hold their 2026-09-17 Last Verified date -- five days unverified, reported as unchecked and never as clean. Per the standing open item the status is raised to the user again on the first run of the week of 2026-09-28, with the same options. |

**Screenshot capture:** Still no case has a screenshot on file -- same network-proxy limitation as prior runs (headless Chromium cannot complete a connection through this environment's egress proxy). Explained to the user in chat on 2026-09-14; awaiting their choice of approach (manual capture vs. Wayback Machine vs. environment-level fix).
